Personal Bio:

Full Name: Qiniso Manqoba Mngomezulu

Date of Birth: [2001-01-28]

Age: [24]

Gender: Male]

Height: [1.83 m / 6'0"]

Nationality: South African

Languages: English, Afrikaans, Zulu,

Marital Status: [Single]

Residence: Alberton, Johannesburg

Personal Profile

- I am a graduate software developer and IT support specialist with hands-on experience in Java, C#, JavaScript, Python, and SQL, and a strong foundation in building reliable software using SDLC-driven practices. I develop and consume RESTful APIs, work confidently with JSON and XML, and implement secure authentication and authorization using OAuth and JWT. I am comfortable validating API workflows using Postman, and I have experience writing meaningful automated tests using frameworks such as xUnit and JUnit. I regularly use Git and GitHub for version control and collaboration, and I work productively in Visual Studio and VS Code. I also have foundational experience with Docker and DevOps-aligned workflows, supporting environment setup, automation, and lightweight service deployments when required.
- In addition, I have strong exposure to data analysis, including interpreting datasets, working with structured data, and extracting insights to support decision-making. I also have foundational knowledge of Machine Learning concepts and workflows, including data preparation, model evaluation principles, and applying data-driven problem-solving approaches.
- Beyond technical ability, I bring strong communication skills, a calm and solution-driven mindset, and leadership experience. I served as Vice-Captain in first-team sport and mentored peers at St Benedict's College for Boys, strengthening my teamwork, discipline, and ability to perform under pressure. Academically, I have achieved multiple distinctions, including in Innovation & Leadership and Project Management, supported by strong results in Programming, Web Development, Databases, and Mathematics. I have completed 272 credits to date with a weighted average of approximately 69.1%.
- I am proficient in English, Afrikaans, isiZulu, Setswana, and isiXhosa. I am a South African citizen with a valid driver's license, and I am available for internship or graduate opportunities.
